# ALUMINUM PADLOCK TTLKAPG30

Security level

Aluminum alloy key lock function

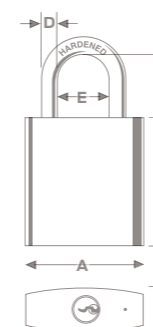

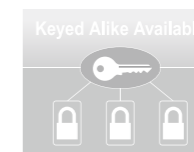

Technical Data

- Aluminum padlocks are the lightest aluminum locks on the market, made of recycled materials.
- The standard size of the lock body is 1.6 inches. H x 1.5 "W x 0.75" D
- Bright anodized finish provides greater visibility and fade resistance in all environments
- The reserved parallel center keyway provides the best security (to prevent someone from getting a copy made at the local key store)
- Aluminum shackles have excellent fire resistance and corrosion resistance
